

### Overview

#### HP ProLiant DL580 Gen8

The HP ProLiant DL580 Gen8 Server is an enterprise-grade four socket (4S) x86 server offering breakthrough performance, rock-solid reliability, and compelling consolidation and manageability efficiencies. It is ideal for mission-critical enterprise, business intelligence, and database applications.

Featuring Intel® Xeon® E7-4800/8800 v2 processors, the DL580 Gen8 offers blazing fast results with enhanced processor performance, more memory slots (96 DIMMs), greater IO bandwidth (9 PCIe Gen3.0 slots), and increased storage performance (12 Gbps SAS). HP ProLiant DL580 Gen8 has security and data protection features for system resiliency that your business can depend on. With intelligent manageability through HP OneView, iLO 4, and user-inspired features, you get faster, lower cost infrastructure management.

#### Front View:

1. One front video port
2. Server lifting handles
3. Universal Tool-less "Snap in" sliding rail solution
4. 4U (7" height) form factor
5. Support for up to four Intel® Xeon® 4800/8800 v2 Processors
6. Up to 9 slots supported; all full-length/full-height
7. Quick removal access panel
8. Quick release lever for Processor and Memory drawer
9. Slide out Systems Insight Display
10. Power button
11. Health and Network LEDs
12. Unit ID LED
13. Front accessible Processor and memory drawer
14. 4 Hot Plug Fans (eight rotors with N+1 redundancy)
15. Asset tag
16. Support for up to 10 Small Form-Factor (SFF) drives
17. Two front accessible USB 2.0 ports

#### Rear View:

1. NIC ports
2. Serial port
3. Video port
4. Four (4) USB ports
5. Hot Plug Redundant Power Supplies (2 or 4 depending on the model)
6. 9 PCIe 3.0 IO Expansion Slots
7. iLO connector

#### What's New

- Enhanced memory speeds for 4GB, 8GB, 16GB DIMMs in performance and lockstep mode.
- Support for HP IB FDR/EN 40Gb 2P 544+FLR-QSFP Adptr
- Support for 64 GB DIMMs. Extends DL580 Gen8 maximum memory up to 6 TB.
- Support for 81E and 82E 8 Gbps Fibre-Channel Host Bus Adapter
- Support for FibreChannel over Ethernet (FCoE) functionality in CN1100R and 534FLR-SFP+

### Standard Features

**NOTE:** For the Standard Features shipped in the "Factory Integrated Models", please see the "Configuration Information - Factory Integrated Models" section.

#### Processor

One or more of the following depending on model

##### Fifteen-Core Processors

Intel® Xeon® E7-4890v2 (2.8GHz/15-core/37.5MB/155W) Processor

Intel® Xeon® E7-4880v2 (2.5GHz/15-core/37.5MB/130W) Processor

Intel® Xeon® E7-4870v2 (2.3GHz/15-core/30MB/130W) Processor

Intel® Xeon® E7-8880Lv2 (2.2GHz/15-core/37.5MB/105W) Processor

**NOTE:** This is a power optimized processor

##### Twelve-Core Processors

Intel® Xeon® E7-4860v2 (2.6GHz/12-core/30MB/130W) Processor

Intel® Xeon® E7-4850v2 (2.3GHz/12-core/24MB/105W) Processor

Intel® Xeon® E7-8857v2 (3.0GHz/12-core/30MB/130W) Processor

**NOTE:** This is frequency optimized processor suited high performance computing applications

##### Ten-Core Processors

Intel® Xeon® E7-4830v2 (2.2GHz/10-core/20MB/105W) Processor

Intel® Xeon® E7-8891v2 (3.2GHz/10-core/37.5MB/155W) Processor

**NOTE:** This is a lower core, higher frequency processor for software licensing cost optimization

##### Eight-Core Processors

Intel® Xeon® E7-4820v2 (2.0GHz/8-core/16MB/105W) Processor

##### Six-Core Processors

Intel® Xeon® E7-4809v2 (1.9GHz/6-core/12MB/105W) Processor

Intel® Xeon® E7-8893v2 (3.4GHz/6-core/37.5MB/155W) Processor

**NOTE:** This is a lower core, higher frequency processor for software licensing cost optimization

#### Cache Memory

One of the following depending on model

37.5MB (1 x 37.5MB) Level 3 cache (E7-4890 v2, E7-8880Lv2, E7-4880v2, E7-8891v2, E7-8893v2)

30MB (1 x 30MB) Level 3 cache (E7-8857v2, E7-4870v2, E7-4860v2)

24MB (1 x 24MB) Level 3 cache (E7-4850v2)

20MB (1 x 20MB) Level 3 cache (E7-4830v2)

16MB (1 x 16MB) Level 3 cache (E7-4820v2)

12MB (1 x 12MB) Level 3 cache (E7-4809v2)

#### Chipset

Intel® C602J Chipset

Intel® Xeon® E7-4800/8800 v2 Processor Family

**NOTE:** For more information regarding Intel chipsets, please see the following URL:

<http://www.intel.com/products/server/chipsets/>

#### Upgradeability

Up to:

Four (4) processors

Ninety-six (96) DDR3 DIMM slots

Nine (9) PCIe Gen3 expansion slots

**NOTE:** PCIe slot availability is dependent on the number of processors installed. Please refer to the "Expansion slots" section for more details.

Ten (10) SFF internal HDD/SSD drive bays

**NOTE:** Five drive bays come standard. An optional backplane kit with five drive bays can be ordered for ten drives.

Four (4) redundant hot-plug power supplies

#### Memory

Type

HP SmartMemory

### Standard Features

One of the following depending on Model

DIMM Slots Available      96 DIMM slots  
Maximum      6TB (96 x 64GB)

**NOTE:** HP memory from previous generation servers are not qualified or warranted with this HP ProLiant Server. HP SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen8. For additional information, please see the HP SmartMemory QuickSpecs at:

[http://h18000.www1.hp.com/products/quickspecs/14225\\_div/14225\\_div.html](http://h18000.www1.hp.com/products/quickspecs/14225_div/14225_div.html)

**NOTE:** LRDIMM and RDIMM are distinct memory technologies and cannot be mixed within a server.

**NOTE:** Depending on the memory configuration and processor model, the memory speed may run at 1600MHz, 1333MHz, or 1066MHz. Please see Memory Population Table below or the Online Memory Configuration Tool at: [www.hp.com/go/ddr3memory-configurator](http://www.hp.com/go/ddr3memory-configurator).

### System Fault Management and Diagnostics

HP ProLiant DL580 Gen8 offers advanced error recovery, component quarantine, fault tolerance and event reporting features to enable class-leading availability and rock-solid reliability that businesses can depend on. The DL580 Gen8 server firmware features advanced machine check architecture and memory fault tolerance capabilities that customers need for running their mission-critical applications. These advanced fault management features combine with quality components (HP Qualified Options) and extensive qualification to provide a high degree of system availability.

#### HP Advanced Error Recovery

Introduced with the HP ProLiant DL580 Gen8, HP Advanced Error Recovery enables applications to recover from uncorrectable errors found in processor, cache and memory during execution. The system firmware works with the operating system and/or hypervisor and/or end-application to enable the optimal recovery response so that the impact of the error can be avoided or minimized. Where such an error would have crashed the system in the past, with HP Advanced Error Recovery, the system can continue to function with limiting the impact of the error to a killed/re-started thread, process and/or virtual machine.

#### NOTE:

- Supported on Intel® E7-4800/8800 v2 based systems only
- On select Operating Systems, Hypervisors and end-applications that support Intel Machine Check Architecture Recovery feature.
  - Windows Server 2012 R2 and Hyper-V 2012 R2
  - Windows Server 2012 (requires Microsoft hotfix 2901012) and Hyper-V 2012
  - Redhat Enterprise Linux 6.4 and later
  - SLES 11 SP3 and later

#### HP Memory Quarantine

HP Memory Quarantine identifies memory regions containing uncorrectable hardware errors by using a patrol scrubber and isolates the bad memory location before it affects other data. If an error is found, the hardware attempts to correct it. If the hardware cannot correct the error, the platform firmware notifies the operating system. Depending on the state of the memory pages associated with the identified memory region, the OS or hypervisor may take those pages out of the available pool. If the memory pages are already committed to a virtual machine (VM), the OS or hypervisor may choose to shut down the associated VM (Guest OS) or cause a Machine Check Exception to the Guest OS. The associated VM (Guest OS) might in turn close down the affected thread or process or it might shut down on its own. You can restart the halted VM or process once you replace the bad memory at the server's next maintenance cycle.

#### NOTE:

### Standard Features

- Supported on Intel® E7-4800/8800 and E7 v2 based systems only
- On select Operating Systems, Hypervisors and end-applications that support Machine Check Architecture Recovery functionality.
  - Windows Server 2012 R2 and Hyper-V 2012 R2
  - Windows Server 2012 (requires Microsoft hotfix 2901012) and Hyper-V 2012
  - Windows Server 2008 R2 and Hyper-V 2008 R2
  - Windows Server 2008 and Hyper-V 2008
  - Redhat Enterprise Linux 6.4
  - SLES 11 SP3

#### HP Advanced Error Containment

The DL580 Gen8 features advanced PCIe error containment capability that prevents corrupted data propagation. If data corruption is found on the PCIe bus, the system re-sets the PCIe root port and re-starts the transaction. This feature helps protect customer data and prevents the error from creating a chain of failures across the datacenter.

#### NOTE:

- Supported on Intel® E7-4800/8800 and E7 v2 based systems only

#### HP Advanced Fault Resiliency

- Double Data Device Correction (DDDC+1) - Detects and corrects up to two DRAM chip failures for every x4 DIMM plus single bit error in the server. DDDC requires memory lockstep mode and may impact performance to varying degrees depending on workload memory access characteristics.

**NOTE:** Supported on Intel® E7-4800/8800 based systems only.

- Single Data Device Correction (SDDC+1) - Detects and corrects one DRAM chip failure for every x4 DIMM in the server. Further corrects single-bit errors after one DRAM chip failure. SDDC is supported in performance mode and does not impact system performance.

**NOTE:** Supported on Intel® E7-4800/8800 based systems only.

- Online Memory Sparing - Tracks excessive number of correctable errors and copies the contents of an unhealthy rank to an available spare rank in advance of multi-bit or persistent single-bit failures that may result in future uncorrectable faults. Since a DIMM or a rank is needed to perform sparing, this technique reduces the total amount of available memory by the amount of memory used for sparing.

- Memory Mirroring - System maintains two copies of all data. If an uncorrectable memory error occurs, the system automatically retrieves the good data from the mirrored (redundant) copy. Memory Mirroring consumes 50% of the system memory capacity.

**NOTE:** Memory mirroring will be supported in a system firmware update post initial launch.

- Redundant Interconnects and Failover - The DL580 Gen8 system and Intel® Xeon® E7-4800/8800 v2 processors combine to provide a high degree of fault tolerance and failover capabilities for key processor-processor or memory-processor links or clocks.
- Hot-plug redundant power supplies and hot-plug fans - The DL580 Gen8 server features N+N redundant power supplies and N+1 rotor (each fan module contains two rotors) redundancy to keep your system running in the unlikely case a power supply or rotor malfunctions.
  - Each fan contains two independent rotors. If one rotor fails, system continues operation in a degraded condition with remaining rotors. If two rotors fail, system initiates an OS shutdown. Two rotor failures is a highly unlikely event.
  - If a fan module (i.e. two rotors) is removed as a hot-plug event, the replacement fan module must be installed within approximately 60 seconds before the system

## Standard Features

initiates an OS shutdown.

<b>FlexibleLOM</b>	HP ProLiant Gen8 servers offer a new flexible network technology - FlexibleLOMs, which offers customers a choice of 1Gb, 10Gb, or 10Gb base-T Ethernet or converged networking in their embedded adapter. HP Ethernet 1Gb 4-port 331FLR FIO Adapter HP Ethernet 1Gb 4-port 366FLR FIO Adapter HP Ethernet 10Gb 2-port 533FLR-T FIO Adapter HP FlexFabric 10Gb 2-port 534FLR-SFP+ FIO Adapter <b>NOTE:</b> This adapter does not support FCOE Boot from SAN functionality on VMWare and FCOE with RHEL 5.9. HP Ethernet 10Gb 2-port 560FLR-SFP+ FIO Adapter HP Ethernet 10Gb 2-port 561FLR-T FIO Adptr HP IB FDR/EN 40Gb 2P 544+FLR-QSFP Adptr <b>NOTE:</b> For additional details see the Networking Section of this document. <b>NOTE:</b> Wake-on-Lan feature is not supported on the DL580 Gen8 with FlexLOMs
--------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

## Expansion Slots

**NOTE:** Up to 9 slots supported; all full-length/full-height. Standard: 4 PCI-E 3.0 x8, 5 PCI-E 3.0 x16.

Processor	Expansion Slot #	Technology	Width	Connector Width*	Bus / Dev Number**	Form Factor	Notes
4	1	PCIe 3.0	x16	x16	C0/03/0	FH/FL	N/A
4	2	PCIe 3.0	x16	x16	C0/02/0	FH/FL	N/A
3	3	PCIe 3.0	x16	x16	80/03/0	FH/FL	N/A
3	4	PCIe 3.0	x8	x16	80/02/0	FH/FL	N/A
3	5	PCIe 3.0	x8	x16	80/02/1	FH/FL	N/A
2	6	PCIe 3.0	x16	x16	40/03/0	FH/FL	N/A
2	7	PCIe 3.0	x8	x16	40/02/0	FH/FL	N/A
2	8	PCIe 3.0	x8	x16	40/02/1	FH/FL	N/A
1	9	PCIe 3.0	x16	x16	00/03/0	FH/FL	N/A

**NOTE:** PCIe slot availability is dependent on the number of processors installed.

\* Default bus assignment. Inserting cards with PCI bridges may alter the actual bus assignment number.

\*\* Slots are enumerated differently based on OS. MS OS's enumerate from lowest to highest Device ID by bus (starting with the lowest bus).

FL= Full length; FH = Full height.

## Storage Controller

One of the following depending on Model

HP Smart Array P830i/2G FBWC Controller

The Flash Backed Write Cache (FBWC) increases cache data retention capabilities from two days of existing battery backed write cache (BBWC) to infinite data retention.

- Delivers 12 Gb/s line rate performance
- Standard on all Models
- Supports HP Secure Encryption as an option
- Transportable data protection
- Increases overall controller performance

**NOTE:** Please refer to the HP Smart Array P830 Controller QuickSpecs for more information.

### Standard Features

<b>Internal Storage Devices</b>	Hard Disk Drive Backplane	Internal SAS lower and upper backplanes support up to ten SFF hard disk drives or solid state drives			
<b>NOTE:</b> For CTO models, five (5) lower drive bays ship standard and five (5) upper drive bays can be ordered separately with a drive backplane kit. For BTO models, please refer to the pre-configured models section below.					
	Diskette Drive	None			
	Optional Optical Drive	None			
	Hard Drives	None ship standard			
<b>Maximum Internal Storage</b>	Hot Plug SFF SAS	12 TB	10 x 1.2 TB		
	Hot Plug SFF SAS SSD	16 TB	10 x 1.6 TB		
	Hot Plug SFF SATA SSD	8 TB	10 x 800 GB		
<b>Interfaces</b>	Serial	1			
	Video	1 front; 1 rear			
	Network RJ-45	4			
	iLO 4 Remote Management	1			
	micro-SD Slot	1			
	USB 2.0 Ports	8 total: 2 front; 4 rear; 2 internal			
<b>Industry Standard Compliance</b>	ACPI 2.0. Compliant				
	PCIE 2.0 Compliant				
	PXE Support				
	WOL Support				
	<b>NOTE:</b> Not supported with FlexLOMs on DL580 Gen8				
	Physical Address Extension (PAE) Support				
	Microsoft® Logo certifications				
	USB 2.0 Support				
<b>Server Power Cords</b>	Server ships with high-voltage server to PDU power cord				
	<b>NOTE:</b> If customers require a local power cord, they can check the power cord matrix for the appropriate county specific sku. Please see the following power cord matrix for details: <a href="http://www.hp.com/go/powercordmatrix">http://www.hp.com/go/powercordmatrix</a>				
<b>Common Slot Power Supply</b>	HP 1500W Common Slot Platinum Plus Hot Plug Power Supply				
One of the following depending on power requirements	HP 1200W Common Slot Platinum Plus Hot Plug Power Supply				
	<b>NOTE:</b> 1500W power supply supports high line voltage only				
	<b>NOTE:</b> A minimum of two (2) power supplies are required. Four (4) 1500W power supplies offers N+N redundancy for highly loaded configurations.				
	Prior to making a power supply selection it is highly recommended that the HP Power Advisor is run to determine the right size power supply for your server configuration. The HP Power Advisor is located at: <a href="http://www.hp.com/go/hppoweradvisor">www.hp.com/go/hppoweradvisor</a> .				
	HP's Common Slot (CS) power supplies allow for commonality of power supplies across a wide range of ProLiant and Integrity servers, as well as HP Storage solutions, and are designed to provide the highest power supply efficiency without degrading system performance. HP CS power supplies are				

### Standard Features

tested by the Electric Power Research Institute (EPRI) and certified through the ECOS 80 Plus power supply program. HP CS power supply options provide efficiency ratings of up to 94% (80 Plus Platinum) and are available in three power output options - 460W, 750W, and 1200W - allowing the customer to "right-size" a power supply for their specific server configuration. All HP Common Slot power sources are UL, CE Mark Compliant, hot-plug and support redundant configurations.

HP CS Platinum Plus power supplies are required when enabling HP's Intelligent Power Discovery (IPD) solution. IPD is the first technology to create an automated, energy-aware network between IT systems and facilities. This allows your company to reclaim millions of dollars in wasted power capacity and downtime costs across data centers. For more information on HP's IPD solution, go to [www.hp.com/go/ipd](http://www.hp.com/go/ipd).

**NOTE:** Mixing of power supplies in the same server is not supported. All power supplies must be of the same output and efficiency rating. If non-matched power supplies are inserted you will get errors and operation will fail.

<b>System Fans</b>	4 Hot Plug Fans (eight rotors with N+1 redundancy)
<b>Graphics</b>	Integrated Matrox G200 video standard 1280 x 1024 (32 bpp) 1920 x 1200 (16 bpp)
	HP iLO 4 On System Management Memory 16 MB Flash 256 MB DDR 3 with ECC (112 MB after ECC and video)
<b>Form Factor</b>	4U rack
<b>HP Server UEFI ROM</b>	<b>Legacy Mode or Unified Extensible Firmware Interface (UEFI) Mode</b> HP's ProLiant System BIOS is an EDK2 UEFI solution, and adheres to the latest revisions of UEFI Class 2 specifications which supports both legacy boot and UEFI boot operation. The HP ProLiant DL580 Gen8 defaults to legacy boot operation and can be factory or field configured for UEFI boot operation.  <b>NOTE:</b> For UEFI boot operation, boot environment and OS image installations should be configured properly to support UEFI. <b>NOTE:</b> For more information on HP's ProLiant System BIOS and UEFI, see the UEFI Information Library: <a href="http://www.hp.com/go/uefi/docs">http://www.hp.com/go/uefi/docs</a> . <b>NOTE:</b> HP UEFI F10 Setting (758959-B21) can be selected to configure the system in UEFI mode in the factory.  To modify the server configuration ROM default settings, press F9 in the HP ProLiant POST screen to enter the UEFI System Utilities screen. By default, the System Utilities menus are in the English language.
	UEFI enables numerous new capabilities, including both industry standard functionality and features specific to HP ProLiant servers. Following are some of the features that UEFI enables and that the HP ProLiant DL580 Gen8 can support when configured for UEFI boot operation: <ul style="list-style-type: none"><li>Secure Boot - A new feature in which the system firmware, option card firmware, operating systems, and software collaborate to greatly enhance platform security.</li></ul>

- Secure Boot - A new feature in which the system firmware, option card firmware, operating systems, and software collaborate to greatly enhance platform security.

### Standard Features

- Operating system specific functionality - Microsoft Windows 2012 supports several features only when installed in UEFI mode.
- Support for > 2.2 TB (using GPT) boot drives - Such drives could previously only be used for boot drives when using RAID solutions such as HP Smart Array.
- UEFI Shell - Provides a pre-boot environment for running scripts and tools. The HP ProLiant UEFI Shell provides both standard capabilities as well as numerous enhancements.
- PXE boot support for IPv6 networks.
- PXE Multicast Boot allowing for faster PXE deployments for large numbers of servers.
- Boot support for option cards that only support a UEFI option ROM.

#### NOTE:

- When the server is configured for UEFI Boot Mode, PXE servers must be configured with a UEFI boot image.
- When the server boots in UEFI mode, it does not boot media with a legacy OS installation. This includes DOS targets and Windows or Linux systems installed in Legacy mode. The reverse is also true for servers that boot in Legacy mode.
- If Microsoft Windows 2008 or Windows 2008 R2 is used in UEFI Boot Mode, UEFI Optimized Mode must be disabled (this option is enabled by default). This is required to work around an issue in Windows 2008 / 2008 R2 that requires legacy BIOS components necessary for video operations in Windows.

### Operating Systems and Virtualization Software Support for ProLiant Servers

Microsoft Windows Server  
Red Hat Enterprise Linux (RHEL)  
SUSE Linux Enterprise Server (SLES)  
VMware

**NOTE:** For more information on HP's Certified and Supported ProLiant Servers for OS and Virtualization Software and latest listing of software drivers available for your server, please visit our Support Matrix at: <http://www.hp.com/go/ossupport> and our driver download page <http://www.hp.com/support/DL580Gen8>

### On System Management

#### HP iLO Management

HP iLO Management is a comprehensive set of embedded management features supporting the complete lifecycle of the server, from initial deployment, through ongoing management, to service alerting and remote support. HP iLO Management Engine comes standard on all HP ProLiant Gen8 servers. The HP iLO Management portfolio includes:

**HP iLO:** The HP iLO (Integrated Lights-Out) management processor is the core foundation for the HP iLO Management Engine

**HP Agentless Management:** Provides built in server health monitoring and alerting capability without OS agents, that starts working the moment a power cord and an Ethernet cable are connected.

**HP Active Health System:** Always on, continuous monitoring for increased stability and shorter downtimes; 100% configuration history; Health and service alerts and easy export and upload to Service and Support.

**HP Intelligent Provisioning:** Lets customers provision and configure a single server without any separate media.

To start Intelligent Provisioning:

Press the F10 key during the ProLiant Gen8 server boot

### Standard Features

Process. Please go to the Intelligent Provisioning website at [www.hp.com/go/intelligentprovisioning](http://www.hp.com/go/intelligentprovisioning) for additional information and to view usage videos. Use the Service Pack for ProLiant (SPP) at [www.hp.com/go/spp](http://www.hp.com/go/spp) to get firmware and software updates.

**HP iLO Mobile App:** Enables the ability to access, deploy, and manage your server anytime from anywhere from select smartphones and mobile devices. For additional information please visit: [www.hp.com/go/ilo/mobileapp](http://www.hp.com/go/ilo/mobileapp)

**NOTE:** For more information, visit: <http://www.hp.com/go/ilo> or HP iLO Management Engine technologies whitepaper

#### HP Insight Management

#### HP Service Pack for ProLiant

HP Service Pack for ProLiant (SPP) and HP Smart Update Manager (HP SUM) provide a comprehensive approach to firmware and system software maintenance. Together they provide better operating stability and ensure maximum uptime. The SPP will be updated at a predictable cadence, typically coinciding with new HP server hardware launches. By enabling firmware to be updated online and integrating firmware and system software updates in one operation, HP SUM and the SPP offer faster updates of individual servers and dramatically faster updates of entire BladeSystem enclosures. Further improving system uptime and stability is the fact that HP provides 12 months of support for each Service Pack for ProLiant release.

The user experience around HP SUM and the SPP has been improved in several ways, starting with the web download. A single web page provides access to a single download containing both the latest version of HP SUM and the latest SPP. Optional smaller subsets with only specific types of servers or specific operating systems are offered to save on download time. The HP SUM application provides a straightforward, intuitive user interface that guides the user through the steps of discovery, analyses and update, providing comprehensive information on available updates, criticality and interdependencies. This information is also available in reports. By providing the option of multiple local or shared repositories which can be easily updated from hp.com, HP SUM provides the tools to optimize stability and consistency throughout the company. While HP SUM and the SPP recommend the combinations of firmware and system software that HP has found to be the best practice, the application gives customers the flexibility to set their own specific baseline.

The Service Pack for ProLiant has been rigorously tested with specific attention for interaction between firmware, drivers and agents both within the server as well as in interaction with the BladeSystem enclosure components (Onboard Administrator and Virtual Connect). This testing ensures the highest quality as well as providing the input for HP SUM to deploy updates taking into account all interdependencies, when determining the correct updates and order of update deployment.

**NOTE:** The Service Pack for ProLiant (which includes HP SUM) can be downloaded from [www.hp.com/go/spp/download](http://www.hp.com/go/spp/download). More information can be found: <http://www.hp.com/go/SmartUpdate>, [www.hp.com/go/spp](http://www.hp.com/go/spp) and <http://www.hp.com/go/hpsum>

#### Intelligent Manageability

#### HP Systems Insight Manager SmartStart Redundant ROM

### Standard Features

- Remote Flash ROM
- Management Agents
- Integrated Management Log (IML)
- Automatic Server Recovery-2 (ASR-2)
- ROM-Based Setup Utility (RBSU)
- Dynamic Sector Repairing (with Smart Array Controllers)
- Drive Parameter Tracking (with Smart Array Controllers)
- Pre-Failure Warranty (covers processors, SAS hard drives and memory)
- Redundant/adaptive load balancing NIC Support
- Hot Spare Boot

**NOTE:** Upon the event of a failed processor in a multi-processing environment, the system will automatically reboot and use the remaining good processor(s).

<b>HP Insight Online</b>	HP Insight Online is a new capability available through the HP Support Center portal for one stop, secure access to product and HP support information specific to your IT environment. Insight Online can automatically display devices remotely monitored by HP Insight Remote Support. With Insight Online's easy navigation you can efficiently track your IT support contracts and device status from anywhere and at anytime. <a href="http://www.hp.com/go/insightonline">www.hp.com/go/insightonline</a>
<b>HP Proactive Insight experience</b>	Prevent problems with innovative, automated monitoring tools and proactive services. The HP Proactive Insight experience consist of using Insight Online, Insight Remote Support, and Proactive Care Support Service as one integrated solution. The Proactive Insight experience provides you with expert advice and personalized, cloud-based automated IT support, helping to prevent unplanned down time and solve problems quickly. For more information, visit: <a href="http://www.hp.com/go/proactiveinsightexperience">www.hp.com/go/proactiveinsightexperience</a>
<b>Security</b>	<ul style="list-style-type: none"><li>Power-on password</li><li>Keyboard password</li><li>External USB port enable/disable</li><li>Network Server Mode</li><li>Serial interface control</li><li>Administrator's password</li><li>Trusted Platform Module (TPM)</li><li>Intel® Secure Key</li><li>HP Secure Encryption (Smart Array Controller)</li><li>HP Advanced Data Guard (Smart Array Controller)</li></ul>
<b>Warranty</b>	<p>This product is covered by a global limited warranty and supported by HP Services and a worldwide network of HP Authorized Channel Partners resellers. Hardware diagnostic support and repair is available for three years from date of purchase. Support for software and initial setup is available for 90 days from date of purchase. Enhancements to warranty services are available through HP Care Pack services or customized service agreements. Hard drives have either a one year or three year warranty; refer to the specific hard drive QuickSpecs for details.</p> <p><b>NOTE:</b> Server Warranty includes 3-Year Parts, 3-Year Labor, 3-Year Onsite support with next business day response. Warranty repairs may be accomplished through the use of Customer Self Repair (CSR) parts. These parts fall into two categories: 1) Mandatory CSR parts are designed for easy replacement. A travel and labor charge will result when customers decline to replace a Mandatory CSR part; 2) Optional CSR parts are also designed for easy replacement but may involve added complexity. Customers may choose to have HP replace Optional CSR parts at no charge. Additional information regarding worldwide limited warranty and technical support is available at: <a href="http://h18004.www1.hp.com/products/servers/platforms/warranty/index.html">http://h18004.www1.hp.com/products/servers/platforms/warranty/index.html</a></p>

### Optional Features

<b>HP Insight management</b>	HP Insight Control	HP Insight Control, a product option, delivers essential infrastructure management that can help save time and money by making it easy to deploy, migrate, monitor, remote control, and optimize your IT infrastructure through a single, simple management console. For more information, see <a href="http://www.hp.com/go/insightcontrol">http://www.hp.com/go/insightcontrol</a> .
		HP Insight Control includes one year of 24 x 7 HP Software Technical Support and Update Service ensuring rapid access to HP support staff and proactive delivery of software updates. For more information about this service, see: <a href="http://www.hp.com/services/insight">http://www.hp.com/services/insight</a> .
	HP iLO Advanced	HP Integrated Lights-Out Advanced License a product option, providing smart remote server management without compromise. iLO Advanced unlocks the full set of remote administration functionality for all HP ProLiant servers by activating the full Virtual Keyboard Video and Mouse remote console, multi-user collaboration, console record and replay, GUI-based and scripted virtual media and virtual folders, and enhanced security and power management functionality. For more information, see: <a href="http://www.hp.com/go/iloadvance">http://www.hp.com/go/iloadvance</a>
<b>NOTE:</b> For more information, visit: <a href="http://www.hp.com/go/matrixoe">http://www.hp.com/go/matrixoe</a>		
<b>High Performance Clusters</b>	HP Cluster Platforms	HP Cluster Platforms are specifically engineered, factory-integrated large-scale ProLiant clusters optimized for High Performance Computing, with a choice of servers, networks and software. Operating system options include specially priced offerings for Red Hat Enterprise Linux and SUSE Linux Enterprise Server, as well as Microsoft Windows HPC Server. A Cluster Platform Configurator simplifies ordering. <a href="http://www.hp.com/go/clusters">http://www.hp.com/go/clusters</a>
	HP HPC Interconnects	High Performance Computing (HPC) interconnect technologies are available for this server as part of the HP Cluster Platform portfolio. These high-speed InfiniBand and Gigabit interconnects are fully supported by HP when integrated within an HP cluster. Flexible, validated solutions can be defined with the help of configuration tools. <a href="http://www.hp.com/techservers/clusters/ucp/index.html">http://www.hp.com/techservers/clusters/ucp/index.html</a>
	HP Insight Cluster Management Utility	HP Insight Cluster Management Utility (CMU) is an HP-licensed and HP-supported suite of tools that are used for lifecycle management of hyperscale clusters of Linux ProLiant systems. CMU includes software for the centralized provisioning, management and monitoring of nodes. CMU makes the administration of clusters user friendly, efficient, and effective. <a href="http://www.hp.com/go/cmu">http://www.hp.com/go/cmu</a>
<b>Storage Software</b>	Whether you need to solve a specific data protection, archiving, or storage command and control challenge, or deliver on strategic consolidation, compliance, or continuity initiatives, look no further than HP storage software. Our storage software helps you reduce costs, simplify storage	

### Optional Features

infrastructure, protect vital assets and respond faster to business opportunities.

Storage software that gets the job done:

- **Data Protection and Recovery Software**  
Whether you're a large enterprise or a smaller business, HP data protection and recovery software will cost-effectively protect you against disaster and ensure business continuity.
- **Data Archive and Migration Software**  
HP's storage software enables you to comply with data retention and retrieval requirements, improve application performance, and reduce costs by efficiently migrating infrequently accessed or less valuable data to lower cost storage.
- **Storage Resource Management Software (SRM)**  
HP's storage resource management software reduces operational costs and provides the command and control foundation you need to efficiently manage and visualize your physical and virtual environments.
- **Data Replication Software**  
HP offers array-based and host-based replication software for use in disaster recovery, testing, application development and reporting.
- **Storage Device Management Software**  
Maximize your investment in HP storage and networking with software that enables hardware-specific configuration, performance tuning and connectivity management.
- **HP StoreVirtual VSA**  
With HP StoreVirtual VSA you can use the power of virtualization to turn a set of heterogeneous and disconnected physical disk drives in your servers and storage devices into a single pool of logical storage capacity.

**NOTE:** For more information available Storage Software including QuickSpecs, please see: [www.hp.com/go/storage/software](http://www.hp.com/go/storage/software).

### Factory Express Portfolio for Servers and Storage

HP Factory Express offers configuration, customization, integration and deployment services for HP servers and storage products. Customers can choose how their factory solutions are built, tested, integrated, shipped and deployed.

Factory Express offers service packages for simple configuration, racking, installation, complex configuration and design services as well as individual factory services, such as image loading, asset tagging, and custom packaging. HP products supported through Factory Express include a wide array of servers and storage: HP Integrity, HP ProLiant, HP ProLiant Server Blades, HP BladeSystem, HP 9000 servers as well as the MSAxxxx, VA7xxx, EVA, XP, rackable tape libraries and configurable network switches.

For more information on Factory Express services for your specific server model please contact your sales representative or go to: <http://www.hp.com/go/factory-express>.

### HP Simple Configurator

SCE is a guided self service tool to help sales and non technical people provide customers with initial configurations in 3 to 5 minutes. You may then send the configuration on for configuration help, or use in your existing ordering processes. If you require "custom" rack configuration or configuration for products not available in SCE, please contact HP's Customer Business Center or an Authorized Partner for assistance. <http://www.hp.com/products/configurator>

### Service and Support

#### Service and Support

#### HP Technology Services for Industry Standard Servers

HP Technology Services delivers confidence, reduces risk and helps customers realize agility and stability. Connect to HP to help prevent problems and solve issues faster. Our support technology lets you to tap into the knowledge of millions of devices and thousands of experts to stay informed and in control, anywhere, any time.

#### Protect your business beyond warranty with HP Care Pack Services

HP Care Pack Services enable you to order the right service level, length of coverage and response time as you purchase your new server, giving you full entitlement for the term you select.

### Recommended HP Care Pack Services for your HP product

#### Optimized Care

#### HP Proactive Care with 6 hour call-to-repair commitment, three year Care Pack Service

HP Proactive Care helps prevent problems and stabilize IT by utilizing secure, real-time, predictive analytics and proactive consultations when your products are connected to HP. This Care Pack Service combines three years' proactive reporting and advice with our highest level reactive coverage and enhanced escalation management, HP's 24x7, six hour call-to-repair hardware commitment. HP is the only leading manufacturer who makes this level of coverage available as a standard service offering for your most valuable servers. Service includes 24x7 collaborative software support for leading industry standard software running on your HP ProLiant server.

<http://h20195.www2.hp.com/v2/GetPDF.aspx/4AA3-8855ENW.pdf>

#### Standard Care

#### HP Proactive Care with 24x7 coverage, three year Care Pack Service

HP Proactive Care helps prevent problems and stabilize IT by utilizing secure, real-time, predictive analytics and proactive consultations when your products are connected to HP. This Care Pack Service combines three years' proactive reporting and advice with our 24x7 coverage and enhanced escalation management, four hour hardware response time and two hour call back for software questions on leading industry standard software running on your HP ProLiant server.

<http://h20195.www2.hp.com/v2/GetPDF.aspx/4AA3-8855ENW.pdf>

#### Related Services

#### HP ProLiant Server Hardware Installation

Provides for the basic hardware installation of HP branded servers, storage devices and networking options to assist you in bringing your new hardware into operation in a timely and professional manner.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/5981-9356EN.pdf>

#### Factory Express for Servers and storage

HP Factory Express offers configuration, customization, integration and deployment services for HP servers and storage products. Customers can choose how their factory solutions are built, tested, integrated, shipped and deployed. For more information on Factory Express services for your specific server model please contact your sales representative or go to: <http://www.hp.com/go/factory-express>.

#### Data Privacy Services

Protect your data through better media management. HP Data privacy services help manage and protect sensitive data to reduce the risk of unauthorized access to private information and help meet compliance requirements. Our retention services allow you to keep drives and other devices upon failure, our removal services provide convenient data sanitization and our recovery services allow you

### Service and Support

to safely retire IT assets and capture any remaining value from the hardware.  
[www.hp.com/services/dataprivacy](http://www.hp.com/services/dataprivacy)

Additional HP Care Pack services can be found at: <http://www.hp.com/go/cpc>

#### Get connected to HP to improve your support experience

Prevent problems with innovative, automated monitoring tools and proactive services. Combining Proactive Care Services with our remote support technology such as Insight Online provides you with expert advice and personalized, cloud-based automated IT support, helping to prevent unplanned down time and solve problems quickly. For more information, visit:  
[www.hp.com/go/proactiveinsightexperience](http://www.hp.com/go/proactiveinsightexperience)

#### HP Support Center

Personalized online support portal with access to information, tools and experts to support HP business products. Submit support cases online, chat with HP experts, access support resources or collaborate with peers. Learn more <http://www.hp.com/go/hpsc>

HP's Support Center Mobile App allows you to resolve issues yourself or quickly connect to an agent for live support. Now, you can get access to personalize IT support anywhere, anytime. HP Insight Remote Support and HP Support Center are available at no additional cost with a HP warranty, HP Care Pack or HP contractual support agreement.

**NOTE:** HP Support Center Mobile App is subject to local availability.

#### Parts and Materials

HP will provide HP-supported replacement parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements.

Parts and components that have reached their maximum supported lifetime and/or the maximum usage limitations as set forth in the manufacturer's operating manual, product quick-specs, or the technical product data sheet will not be provided, repaired, or replaced as part of these services.

The defective media retention service feature option applies only to Disk or eligible SSD/Flash Drives replaced by HP due to malfunction.

#### For more information

To learn more on HP ProLiant servers and HP BladeSystem servers, please contact your HP sales representative or HP Authorized Channel Partner. Or visit: <http://www.hp.com/services/proliant>

### Pre-configured Models

**NOTE:** For the Standard Features shipped in the "Factory Integrated Models", please see the "Configuration Information - Factory Integrated Models" section.

**NOTE:** Pre-configured models ship with the configurations below. Options can be selected from the Core or Additional options section of this QuickSpecs.

**NOTE:** HP does not allow factory integration of options into pre-configured models. Any additional options purchased will be shipped separately.

**NOTE:** If you desire a custom configuration please see "Configuration Information - Factory Integrated Models" section of this QuickSpecs.

**NOTE:** Not all models are available in all regions. Check with your local country HP offices for availability.

### High Performance Models

<b>HP ProLiant DL580 Gen8</b> <b>E7-4890v2 4P 128GB-R</b> <b>P830i SAS 5 SFF 1500W</b> <b>RPS Server</b> 728544-xx1	<b>Processor(s)</b> <b>Cache Memory</b> <b>Memory</b>  <b>IO Expansion</b> <b>Network Controller</b> <b>Storage Controller</b> <b>Bays and Hard Drives</b> <b>Optical Drive</b> <b>Power Supply</b> <b>Fans</b> <b>Integrated Lights Out</b> <b>Insight Control</b>  <b>Form Factor</b> <b>BIOS</b> <b>Warranty</b>	(4) Intel® Xeon® E7-4890v2 (2.8GHz/15-core/37.5MB/155W) Processors 37.5MB (1 x 37.5MB) Level 3 cache 128GB (16 x 8GB DIMMs) PC3-14900R DIMMs (DDR3) installed in (8) Memory Cartridges  (9) PCIe Gen3.0 I/O Expansion slots (5 x16 slots; 4 x8 slots) HP FlexFabric 10Gb 2P 534FLR-SFP+ Adapter HP Smart Array P830i/2GB FBWC 12 Gbps SAS controller Ten (10) SFF HDD/SSD drive bays. ### Configuration Information - Factory Integrated Models

**NOTE:** This section lists some of the steps required to configure a Factory Integrated Model. To ensure only valid configurations are ordered, HP recommends the use of an HP approved configurator. Contact your local sales representative for information on configurable product offerings and requirements.

**NOTE:** Factory Integrated Models must start with a CTO Server

**NOTE:** FIO indicates that this option is only available as a factory installable option.

### Step 1: Base Configuration

HP Models	HP ProLiant DL580 Gen8 Configure-to-order Server	728551-B21
-----------	--------------------------------------------------	------------

#### Factory Integrated Models ship with:

4U Server Chassis with front-accessible processor and memory drawer

Intel® 602J Chipset

Embedded HP Smart Array 12 G P830i Controller

**NOTE: FBWC is required and should be selected separately when ordering**

(5) Hot-plug SAS/SATA SFF SSD or HDD Bays (Lower)

(9) PCIe Gen3.0 I/O Expansion slots (5 x16 slots; 4 x8 slots)

(8) USB 2.0 ports (2 front, 4 rear, 2 internal)

(2) video ports (1 front, 1 rear)

(1) microSD card slot

(1) Trusted Platform Module (TPM) connector

4 Hot Plug Fans (eight rotors with N+1 redundancy), front accessible

BIOS Legacy mode(default) or Unified Extensible Firmware Interface (UEFI) mode (Optional)

HP Integrated Lights-Out 4 (iLO4) standard management

HP iLO4 Embedded Remote Support Technology

HP Insight Control Server Provisioning

HP Insight Online

HP Active Health System

System Insight Display

Rack rails and cable management arm

**NOTE: PCIe slot availability is dependent on the number of processors installed.**

Please refer to the "Expansion slots" section for more details.

**NOTE:** A minimum of two processors are required. The system may have three or four processors installed.

**NOTE:** A minimum of two memory cartridges are required (one per processor).

**NOTE:** A minimum of two memory DIMMs are required per cartridge (minimum of four DIMMs per server).

**NOTE:** A minimum of two power supplies are required.

### Step 2: Choose Required Options (only one of the following from each list unless otherwise noted)

HP Processors	<b>NOTE:</b> All processor kits contain one processor. If two or more processors are desired, select one xxxxxx-L21 and additional processors would be xxxxxx-B21.
---------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------

#### Fifteen-Core Processors

HP DL580 Gen8 Intel® Xeon® E7-4890v2 (2.8GHz/15-core/37.5MB/155W) FIO Processor Kit	728955-L21
-------------------------------------------------------------------------------------	------------

HP DL580 Intel® Xeon® E7-4880v2 (2.5GHz/15-core/37.5MB/130W) FIO Processor Kit	728957-L21
--------------------------------------------------------------------------------	------------

HP DL580 Gen8 Intel® Xeon® E7-4870v2 (2.3GHz/15-core/30MB/130W) FIO Processor Kit	728959-L21
-----------------------------------------------------------------------------------	------------

HP DL580 Gen8 Intel® Xeon® E7-8880Lv2 (2.2GHz/15-core/37.5MB/105W) FIO Processor Kit	728953-L21
--------------------------------------------------------------------------------------	------------

### Configuration Information - Factory Integrated Models

#### Twelve-Core Processors

HP DL580 Gen8 Intel® Xeon® E7-4860v2 (2.6GHz/12-core/30MB/130W) F10 Processor Kit	728963-L21
HP DL580 Gen8 Intel® Xeon® E7-4850v2 (2.3GHz/12-core/24MB/105W) F10 Processor Kit	728965-L21
HP DL580 Gen8 Intel® Xeon® E7-8857v2 (3.0GHz/12-core/30MB/130W) F10 Processor Kit	728961-L21

#### Ten-Core Processors

HP DL580 Gen8 Xeon® E7-8891v2 (3.2GHz/10-core/37.5MB/155W) F10 Processor Kit	728967-L21
HP DL580 Gen8 Xeon® E7-4830v2 (2.2GHz/10-core/20MB/105W) F10 Processor Kit	728969-L21

#### Eight-Core Processors

HP DL580 Gen8 Intel® Xeon® E7-4820v2 (2.0GHz/8-core/16MB/105W) F10 Processor Kit	728971-L21
----------------------------------------------------------------------------------	------------

#### Six-Core Processors

HP DL580 Gen8 Intel® Xeon® E7-4809v2 (1.9GHz/6-core/12MB/105W) F10 Processor Kit	728975-L21
HP DL580 Gen8 Intel® Xeon® E7-8893v2 (3.4GHz/6-core/37.5MB/155W) F10 Processor Kit	728973-L21

**NOTE:** A minimum of two processors are required. The system may have three and four processors installed.

### HP Memory

**NOTE:** HP memory from previous generation servers are not qualified or warranted with this HP ProLiant Server. HP SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen8. For additional information, please see the HP SmartMemory QuickSpecs at: [http://h18000.www1.hp.com/products/quickspecs/14225\\_div/14225\\_div.html](http://h18000.www1.hp.com/products/quickspecs/14225_div/14225_div.html)

**NOTE:** LRDIMM, RDIMM, UDIMM, and HDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support LRDIMM, RDIMM and UDIMMs.

#### Registered DIMMs (RDIMMs)

HP 4GB (1x4GB) Single Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit	708637-B21
HP 4GB (1x4GB) Single Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit	713981-B21
HP 8GB (1x8GB) Single Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit	731761-B21
HP 8GB (1x8GB) Single Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit	731765-B21
HP 16GB (1x16GB) Dual Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit	708641-B21
HP 16GB (1x16GB) Dual Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit	713985-B21

#### Load Reduced DIMMs (LRDIMMs)

HP 32GB (1x32GB) Quad Rank x4 PC3-14900L (DDR3-1866) Load Reduced CAS-13 Memory Kit	708643-B21
HP 64GB (1x64GB) Octa Rank x4 PC3-12800L (DDR3-1600) Load Reduced CAS-11 Memory Kit	700838-B21

#### Memory Expansion Options

HP DL580 Gen8 12 DIMM Slots Memory Cartridge	732411-B21
----------------------------------------------	------------

**NOTE:** Up to Eight (8) memory cartridges are supported for 96 DIMM slots

### Configuration Information - Factory Integrated Models

**NOTE:** A minimum of two memory cartridges are required (one per processor).

**NOTE:** A minimum of two memory DIMMs are required per cartridge (minimum of four DIMMs per server).

#### FlexibleLOMs

**NOTE:** Only one FlexibleLOM can be added to the server. These options are upgradeable and can be changed from the original configuration after the server is shipped.

**NOTE:** For 10Gb adapters, a minimum of two Gigabytes (2 GB) of server memory is required per each adapter.

**NOTE:** Wake-on-Lan feature is not supported on the DL580 Gen8 with FlexLOMs

HP Ethernet 1Gb 4-port 331FLR FIO Adapter 684208-B21

HP Ethernet 1Gb 4-port 366FLR FIO Adapter 684217-B21

HP FlexFabric 10Gb 2-port 533FLR-T FIO Adapter 700760-B21

HP FlexFabric 10Gb 2-port 534FLR-SFP+ FIO Adapter 700752-B21

HP FlexFabric 10Gb 2-port 556FLR-SFP+ FIO Adapter 732456-B21

**NOTE:**

- This adapter does not support FCOE Boot from SAN functionality on VMWare and FCOE functionality with RHEL 5.9

HP Ethernet 10Gb 2-port 560FLR-SFP+ FIO Adapter 684218-B21

HP Ethernet 10Gb 2-port 561FLR-T FIO Adapter 700700-B21

HP InfiniBand FDR/Ethernet 10Gb/40Gb 2-port 544+FLR-QSFP Adapter 764285-B21

#### HP Power Supplies

**NOTE:** Prior to making a power supply selection it is highly recommended that the HP Power Advisor is run to determine the right size power supply for your server configuration. The HP Power Advisor is located at: [www.hp.com/go/hppoweradvisor](http://www.hp.com/go/hppoweradvisor).

##### HP Common Slot Platinum Plus Power Supply Kits

**NOTE:** 94% efficiency with support for HP Power Discovery Services.

HP 1500W Common Slot Platinum Plus Hot Plug Power Supply Kit 684532-B21

HP 1200W Common Slot Platinum Plus Hot Plug Power Supply Kit 656364-B21

**NOTE:** Minimum of two (2) power supplies are required.

All power supplies in a server should match. Mixing Power Supplies is not supported.

**NOTE:** Option Kits contain the specified power supply and a PDU IEC cable.

**NOTE:** 1500W Power Supplies only support High Line Voltage.

**NOTE:** HP ProLiant servers ship with an IEC-IEC power cord used for rack mounting with Power Distribution Units (PDUs). For a full list of optional HP power cords please go to [www.hp.com/products/powercords](http://www.hp.com/products/powercords)

#### Storage Controller FBWC

HP 2GB FIO Flash Backed Write Cache 758836-B21

HP 4GB FIO Flash Backed Write Cache 698537-B21

**NOTE:** One Flash Backed Write Cache is required for P830i SAS Controller

**NOTE:** Max of 4 capacitor modules can be installed.

### Step 3: Choose Additional Factory Integratable Options

#### Converged Infrastructure Management Software

**HP OneView with iLO Advanced - Server hardware required on same purchase order**

#### HP Insight Software

HP OneView for ProLiant DL Server incl 3yr 24x7 Supp FIO Bundle Physical 1 Svr Lic E5Y43A

HP OneView incl 3yr 24x7 Supp Bundle 1 Svr E-LTU E5Y43AAE

**NOTE:** OneView is supported in Legacy BIOS mode only.

HP Insight Control including 1yr 24x7 Support ProLiant ML/DL/BL-bundle Single Server FIO License C6N36A

### Configuration Information - Factory Integrated Models

HP Insight Control including 1yr 24x7 Support ProLiant ML/DL/BL-bundle FIO C6N36ABE  
Electronic License

**NOTE: The Electronic software license is available in EMEA only.**

<b>Security</b>	HP Trusted Platform Module Option	488069-B21
	HP 4U Security Bezel Kit	741213-B21

### Step 4: Choose Additional Options for Factory Integration

**NOTE:** For additional options, please refer to the "Core Options" and "Additional Options" section below.

### Core Options

**NOTE:** Some options may not be integrated at the factory. To ensure only valid configurations are ordered, HP recommends the use of an HP approved configurator. Contact your local sales representative for additional information.

HP Processors	<b>Fifteen-Core Processors</b>

	HP DL580 Gen8 Intel® Xeon® E7-8893v2 (3.4GHz/6-core/37.5MB/155W) Processor Kit	728973-B21
	<b>NOTE:</b> A minimum of two processors are required. The system may have three or four processors installed.	

HP Memory	<b>NOTE:</b> HP memory from previous generation servers are not qualified or warranted with this HP ProLiant Server. HP SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen8. For additional information, please see the HP SmartMemory QuickSpecs at: <a href="http://h18000.www1.hp.com/products/quickspecs/14225_div/14225_div.html">http://h18000.www1.hp.com/products/quickspecs/14225_div/14225_div.html</a>	
	<b>NOTE:</b> LRDIMM, RDIMM, UDIMM, and HDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support LRDIMM, RDIMM and UDIMMs.	
	<b>Registered DIMMs (RDIMMs)</b>	
	HP 4GB (1x4GB) Single Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit	713981-B21
	HP 16GB (1x16GB) Dual Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit	713985-B21
	HP 4GB (1x4GB) Single Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit	708637-B21
	HP 8GB (1x8GB) Single Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit	731765-B21

## Core Options

Voltage Memory Kit		
HP 8GB (1x8GB) Single Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit	731761-B21	
HP 16GB (1x16GB) Dual Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit	708641-B21	
<b>Load Reduced DIMMs (LRDIMMs)</b>		
HP 32GB (1x32GB) Quad Rank x4 PC3-14900L (DDR3-1866) Load Reduced CAS-13 Memory Kit	708643-B21	
HP 64GB (1x64GB) Octa Rank x4 PC3-12800L (DDR3-1600) Load Reduced CAS-11 Memory Kit	700838-B21	
<b>Memory Expansion Options</b>		
HP DL580 Gen8 12 DIMM Slots Memory Cartridge	732411-B21	
<b>NOTE:</b> Up to Eight (8) memory cartridges are supported for 96 DIMM slots		
<b>NOTE:</b> A minimum of two memory cartridges are required (one per processor).		
<b>NOTE:</b> A minimum of two memory DIMMs are required per cartridge (minimum of four DIMMs per server).		
<b>HP Optical Drives</b>	HP Mobile USB Non Leaded System DVD RW Drive	701498-B21
<b>Factory Settings</b>	HP UEFI FIO Setting	758959-B21
	<b>NOTE:</b> For factory configuration of the server in UEFI mode.	
	HP Lockstep Memory Mode FIO Setting	773559-B21
	<b>NOTE:</b> A minimum of four DIMMs per cartridge is required and all installed cartridges must have identical DIMM configuration.	
<b>HP Hard Drives</b>	<b>NOTE:</b> The components of a storage subsystem (e.g. the drive, the HBA/controller, firmware, and the server backplane) should operate at the same data transfer rate or the system bandwidth will be negotiated down to an acceptable level for all components.	
	<b>NOTE:</b> Hard drives have either a one year or three year warranty; refer to the specific hard drive QuickSpecs for details.	
	<b>SAS Hot Plug with SmartDrive SFF (2.5-inch) Enterprise Drives</b>

HP Ethernet 10Gb 2-port 561T Adapter		716591-B21

### Core Options

#### FlexibleLOM Adapters

HP Ethernet 1Gb 4-port 331FLR Adapter	629135-B21
HP Ethernet 1Gb 4-port 366FLR Adapter	665240-B21
HP FlexFabric 10Gb 2-port 533FLR-T Adapter	700759-B21
HP FlexFabric 10Gb 2-port 534FLR-SFP+ Adapter	700751-B21

**NOTE:** This adapter does not support FCOE Boot from SAN functionality on VMWare and FCOE functionality with RHEL 5.9.

HP Ethernet 10Gb 2-port 560FLR-SFP+ Adapter	665243-B21
HP Ethernet 10Gb 2-port 561FLR-T Adapter	700699-B21
HP InfiniBand FDR/Ethernet 10Gb/40Gb 2-port 544+FLR-QSFP Adapter	764285-B21

**NOTE:** Wake-On-LAN not supported with FlexLOMs on DL580 Gen8

**NOTE:** Please see the QuickSpecs for Technical Specifications and additional information: [www.hp.com/go/ProLiantNICs](http://www.hp.com/go/ProLiantNICs)

#### HP Power Supplies

**NOTE:** Prior to making a power supply selection it is highly recommended that the HP Power Advisor is run to determine the right size power supply for your server configuration. The HP Power Advisor is located at: [www.hp.com/go/hppoweradvisor](http://www.hp.com/go/hppoweradvisor).

#### HP Common Slot Platinum Plus Power Supply Kits

**NOTE:** 94% efficiency with support for HP Power Discovery Services.

HP 1500W Common Slot Platinum Plus Hot Plug Power Supply Kit	684532-B21
HP 1200W Common Slot Platinum Plus Hot Plug Power Supply Kit	656364-B21

**NOTE:** All power supplies in a server should match. Mixing Power Supplies is not supported.

**NOTE:** Option Kits contain specified power supply and PDU IEC cable.

**NOTE:** 1500W Power Supplies only support High Line Voltage.

**NOTE:** HP ProLiant servers ship with an IEC-IEC power cord used for rack mounting with Power Distribution Units (PDUs). For a full list of optional HP power cords please go to [www.hp.com/products/powercords](http://www.hp.com/products/powercords)

#### HP Graphic Options

**NOTE:** Up to five cards are supported on the DL580 Gen8. Supporting multiple number of cards on the DL580 Gen8 blocks some active IO cards as follows due to space constraints:

For 2P config: Max of 2 double-wide cards are supported on slot 6 and slot 9 (slot 8 is blocked)

For 3P config: Max of 3 double-wide cards are supported on slot 3, slot 6 and slot 9 (slot 5 and slot 8 are blocked)

For 4P config: Max of 5 double wide cards are supported on Slot 1, Slot 3, Slot 2, Slot 6 and Slot 9 (slot 5 and slot 8 are blocked).

**NOTE:** HP DL580/DL585/DL980 Power Cable Kit (631660-B21) is required for Graphics cards. Each cable kit has two 8-pin connectors (one 150W and other 225W) and can support up to two cards. For three cards, two cable kits are required. For five cards, three cable kits are required. The cards pull up to 75W of power from the IO slot and the rest from the auxiliary power connectors.

**NOTE:** Both UEFI mode and Legacy Mode are supported.

NVIDIA Quadro K6000 PCI-E Graphics Adapter	730874-B21
--------------------------------------------	------------

**NOTE:** Supported at Gen2 speeds

NVIDIA Tesla K40C 12GB Computational Accelerator	753960-B21
--------------------------------------------------	------------

### Core Options

**NOTE:** Supported at Gen2 speeds

NVIDIA GRID K2 Reverse Air Flow Dual GPU PCIe Graphics Accelerator

753958-B21

**NOTE:** Only three cards are supported with MS Windows Server 2012 R2

### Auxiliary Power Cables

**NOTE:** The DL580 Gen8 supports six auxiliary power connectors

HP DL580/DL585/DL980 Power Cable Kit

631660-B21

**NOTE:** Order with GPGPUs for providing additional power to the IO cards.

### Additional Options

**NOTE:** Some options may not be integrated at the factory. To ensure only valid configurations are ordered, HP recommends the use of an HP approved configurator. Contact your local sales representative for additional information.

### HP Care Pack Services

#### Proactive Care

**NOTE:** Collaborative Support plus Proactive services delivered by the onshore, local language Advanced Solution Center (ASC), end-to-end case ownership from a Technical Solution Specialists and Technical Account Manager who remotely delivers firmware/software revision management, proactive scans and incident trend reports. Recommended for customers running a virtualized infrastructure and/or customers who desire an enhanced call support experience.

HP 3 year 4 hour 24x7 ProLiant DL58x Proactive Care Service	U2Z68E
-------------------------------------------------------------	--------

HP 3 year 4 hour 24x7 with Defective Media Retention ProLiant DL58x Proactive Care Service	U2Z71E
--------------------------------------------------------------------------------------------	--------

HP 3 year 6 hour Call To Repair 24x7 ProLiant DL58x Proactive Care Service	U2Z74E
----------------------------------------------------------------------------	--------

HP 3 year 6 hour Call To Repair 24x7 withDefective Media Retention ProLiant DL58x Proactive Care SVC	U2Z77E
------------------------------------------------------------------------------------------------------	--------

#### Proactive Care Personalized Support - Environmental Option

**NOTE:** To add an onsite Account Support Manager (ASM) to Proactive Care. ASM is an assigned resource who delivers support planning and brings technical expertise and best practices advices for the customer's environment.

HP 3 year ISS ProactiveCare Personalized Support	U6W98E
--------------------------------------------------	--------

#### Installation Services

**NOTE:** Reduce the time required to get your system up and running and help minimize disruptions to your business.

### Additional Options

HP Install ProLiant DL58x Service	U4617E
HP Startup ProLiant DL58x Service	U4618E
HP Installation and Startup for Insight Control Software	UF369E
HP Startup HP Systems Insight Manager Service	UA041E
<b>NOTE: For more information, customer/resellers can contact:</b> <a href="http://www.hp.com/services/carepack">http://www.hp.com/services/carepack</a>	

### Memory

#### HP SmartMemory

New HP SmartMemory now provides additional protection for your servers. With HP Authentication it can verify that you have true HP Qualified Memory in your HP ProLiant Gen8 server. With HP SmartMemory your new HP ProLiant server can take advantage of additional Gen8 enhancements in performance, durability and future manageability support through HP Active Health System.

For detailed memory configuration rules and guidelines, please use the Online DDR3 Memory Configuration Tool: [www.hp.com/go/ddr3memory-configurator](http://www.hp.com/go/ddr3memory-configurator)

#### Memory Sub-system Architecture

As shown in the figure above, memory cartridge to processor association as follows:

- Memory cartridges installed without a corresponding processor are not utilized:
  - Processor 1 corresponds to memory cartridges 1 and 2.
  - Processor 2 corresponds to memory cartridges 3 and 4.
  - Processor 3 corresponds to memory cartridges 5 and 6.  
**NOTE: Memory cartridges 5 and 6 are not recognized if processor 3 is not installed.**
  - Processor 4 corresponds to memory cartridges 7 and 8.  
**NOTE: Memory cartridges 7 and 8 are not recognized if processor 4 is not installed.**

Each memory cartridge contains 12 DIMM slots as shown in figure below:

### Memory

The memory subsystem in this server is divided into channels. Each processor supports eight channels, and each channel supports three DIMM slots, as shown in the table below. White DIMM slots denote the first slot of a channel (Ch 4A, Ch 9B, Ch 1C, Ch 12D...).

Channel	Population order	Slot number
1	A	4
	E	5
	J	6
2	B	9
	F	8
	K	7
3	C	1
	G	2
	L	3
4	D	12
	H	11
	M	10

The server can operate in independent channel mode (performance) or combined channel mode (lockstep). Lockstep mode improves the system reliability and availability. If running with RDIMM (built with x4 DRAM devices), the system can survive the complete failure of two DRAM devices (DDDC). Running in independent mode, the server can only survive the complete failure of a single DRAM device (SDDC).

Memory performance depends on selected processor and whether the system is configured for independent channel mode (performance mode) or lockstep mode (RAS mode).

Max memory speed	Processors
1600MHz	E7-8893 V2, E7-8891 v2, E7-8880L v2, E7-8857 v2, E7-4890 v2, E7-4880 v2, E7-4870 v2, E7-4860 v2
1333MHz	E7-4850 v2, E7-4830 v2, E7-4820 v2
1066MHz	E7-4809 v2

#### Independent channel mode (Performance mode):

In this mode each DDR3 channel works independently and the SMI2 channel operates at twice the DDR3 speed (2667 MT/s max). The server supports the following DIMM speeds as shown below in the table.

DIMM type	DIMM rank	Voltage	1 DIMM per channel	2 DIMMs per channel	3 DIMMs per channel
RDIMM	Single-rank (4 GB)	LV	1333	1066	1066
RDIMM	Single-rank (4 GB)	STD	1333	1333	1333
RDIMM	Single-rank (8 GB)	LV	1333	1066	1066
RDIMM	Single rank (8 GB)	STD	1333	1333	1333
RDIMM	Dual-rank (16 GB)	LV	1333	1066	1066
RDIMM	Dual-rank (16 GB)	STD	1333	1333	1333
LRDIMM	Quad-rank (32GB)	STD	1333	1333	1333
LRDIMM	Octal-rank (64GB)	STD	1066	1066	1066

#### Lockstep mode:

In this mode, the memory controller operates two DDR3 channels behind one memory buffer as single channel and the SMI2 channel operates at the DDR3 transfer rate (1600 MT/s max).

The server supports the following DIMM speeds as shown below in the table.

DIMM type	DIMM rank	Voltage	1 DIMM per channel	2 DIMMs per channel	3 DIMMs per channel
RDIMM	Single-rank (4 GB)	LV	1333	1066	1066
RDIMM	Single-rank (4 GB)	STD	1600	1600	1333
RDIMM	Single-rank (8 GB)	LV	1333	1066	1066

### Memory

RDIMM	Single rank (8 GB)	STD	1600	1600	1333
RDIMM	Dual-rank (16 GB)	LV	1333	1066	1066
RDIMM	Dual-rank (16 GB)	STD	1600	1600	1333
LRDIMM	Quad-rank (32GB)	STD	1600	1600	1333
LRDIMM	Octal-rank (64GB)	STD	1066	1066	1066

### DIMM Classification and Identification

### Memory Population Guidelines

- To maximize performance, install two memory cartridges per processor and balance the total memory capacity between all installed processors.
- When multiple processors are installed, HP recommends installing the DIMMs in sequential alphabetical order: 4A, 9B, 1C, 12D, and so on.
- LRDIMMs support higher densities than single- and dual-rank RDIMMs, and higher speeds than quad-rank RDIMMs. This support enables you to install more high capacity DIMMs, resulting in higher system capacities and higher bandwidth.
- Do not mix LRDIMMs with any other DIMM type (RDIMM, LVDIMM).
- RDIMM population is limited to a maximum of eight logical ranks per channel. Therefore, only two quad rank RDIMMs are supported per channel. If there are more than eight physical ranks per channel, LRDIMMs rank multiplication provides support for three DIMMs per channel.
- Lockstep mode requires specific population requirements. See lock-step configuration below for more information.

**NOTE:** UDIMMs are not supported. This server does not support mixing LRDIMMs, RDIMMs, or UDIMMs. Attempting to mix any combination of these DIMMs can cause the server to halt during BIOS initialization.

For detailed memory configuration rules and guidelines, use the Online DDR3 Memory Configuration Tool on the HP website (<http://www.hp.com/go/ddr3memory-configurator>).

### Online Sparing Configuration Guidelines

Online spare memory provides protection against degraded DIMMs by reducing the likelihood of uncorrected memory errors. This protection is available without any operating system support.

Online spare memory protection dedicates one rank of each memory channel for use as spare memory. The remaining ranks are available for OS and application use. If correctable memory errors occur at a rate higher than a specific threshold on any of the non-spare ranks, the server automatically copies the memory contents of the degraded rank to the online spare rank. The server then deactivates the failing rank and automatically switches over to the online spare rank.

For Online Spare memory mode configurations, observe the following guidelines:

- Observe the general DIMM slot population guidelines.

### Memory

- Each channel must have a valid online spare configuration.
- Each channel can have a different valid online spare configuration.
- Each populated channel must have a spare rank.
- A single dual-rank DIMM is not a valid configuration.
- LRDIMMs are treated as dual-rank DIMMs.

### HP Memory

**NOTE:** HP memory from previous generation servers are not qualified or warranted with this HP ProLiant Server. HP SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen8. For additional information, please see the HP SmartMemory QuickSpecs at:

[http://h18000.www1.hp.com/products/quickspecs/14225\\_div/14225\\_div.html](http://h18000.www1.hp.com/products/quickspecs/14225_div/14225_div.html)

**NOTE:** LRDIMM, RDIMM, UDIMM, and HDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support LRDIMM, RDIMM and UDIMMs.

#### Registered DIMMs (RDIMMs)

HP 4GB (1x4GB) Single Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit	713981-B21
HP 16GB (1x16GB) Dual Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit	713985-B21
HP 4GB (1x4GB) Single Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit	708637-B21
HP 8GB (1x8GB) Single Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit	731765-B21
HP 8GB (1x8GB) Single Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit	731761-B21
HP 16GB (1x16GB) Dual Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit	708641-B21

#### Load Reduced DIMMs (LRDIMMs)

HP 32GB (1x32GB) Quad Rank x4 PC3-14900L (DDR3-1866) Load Reduced CAS-13 Memory Kit	708643-B21
HP 64GB (1x64GB) Octa Rank x4 PC3-12800L (DDR3-1600) Load Reduced CAS-11 Memory Kit	700838-B21

#### Memory Expansion Options

HP DL580 Gen8 12 DIMM Slots Memory Cartridge	732411-B21
----------------------------------------------	------------

**NOTE:** A minimum of two memory cartridges are required (one per processor).

**NOTE:** A minimum of two memory DIMMs are required per cartridge (minimum of four DIMMs per server).

### Storage

1-10 Ten (10) SFF Hot-plug HDD/SSD drive bays  
**NOTE:** Drives installed in bays 6-10 require the optional SAS backplane kit.

### Maximum Internal Storage

Hot Plug SFF SAS	12TB	10 x 1.2TB
Hot Plug SFF SAS SSD	16TB	10 x 1.6TB
Hot Plug SFF SATA SSD	8TB	10 x 800GB

## Technical Specifications

<b>System Unit</b>	<b>Dimensions (H x W x D) (with bezel)</b>	6.88" x 17.48" x 29" (17.5cm x 44.4cm x 73.6cm)
<b>Weight (approximate)</b>	Maximum (all hard drives, power supplies, DIMMs and processors installed)  Minimum (one hard drive, two power supplies, four DIMMs, and two processors installed)	116.56.0 lb (52.87 kg)  70.94 lb (32.18 kg)
<b>Input Requirements (per power supply)</b>	Rated Line Voltage  Rated Input Current  Rated Input Frequency  Rated Input Power	100 - 120 VAC (1200W PS only) 200 - 240 VAC (1200W & 1500W PS)  9.2A (100 VAC), 6.6A (200 VAC) - 1200W PS 8.3A (200 VAC) - 1500W PS  50 to 60 Hz  1000 W (120 VAC), 1320 W (230VAC) - 1200W PS 1652 W (at 230 VAC) - 1500W PS
<b>BTU Rating</b>	Maximum	3408 BTU/hr (120 VAC), 4500 BTU/hr (at 230 VAC) - 1200W PS 5637 BTU/hr (230 VAC) - 1500W PS
<b>Power Specifications</b>	<p><b>NOTE:</b> To review typical system power ratings use the HP Power Advisor which is available online located at url: <a href="http://www.hp.com/go/proliant-energy-efficient">www.hp.com/go/proliant-energy-efficient</a> or <a href="http://www.hp.com/go/hppoweradvisor">www.hp.com/go/hppoweradvisor</a></p> <ul style="list-style-type: none"> <li>- Click on the system of interest. Example: DL580 G7</li> <li>- Follow the instructions of the next screens.</li> </ul>	
<b>Power Supply Output (per power supply)</b>	Rated Steady-State Power and Maximum Peak Power	800 W (100 VAC low line), 900 W (120 VAC low line), 1200W (200 - 240 VAC) for 1200W PS 1500W (200 - 240V) for 1500W PS
<b>System Inlet Temperature</b>	Operating  Non-operating	10° to 35°C (50° to 95°F) at sea level with an altitude derating of 1.0°C per every 304.8 m (1.8°F per every 1000 ft) above sea level to a maximum of 3048 m (10,000 ft), no direct sustained sunlight. Maximum rate of change is 10°C/hr (18°F/hr). The upper limit may be limited by the type and number of options installed.  System performance may be reduced if operating with a fan fault or above 30°C (86°F). -40° to 70°C (-40° to 158°F). Maximum rate of change is 20°C/hr (36°F/hr).
<b>Relative Humidity (non-condensing)</b>	Operating  Non-operating	10% to 90% relative humidity (Rh), 28°C (82.4°F) maximum wet bulb temperature, non-condensing.  5 to 95% relative humidity (Rh), 38.7°C (101.7°F) maximum wet bulb temperature, non-condensing.
<b>Altitude</b>	Operating	3048 m (10,000 ft). This value may be limited by the type and number of options installed.

### Technical Specifications

		Maximum allowable altitude change rate is 457 m/min (1500 ft/min).
	Non-operating	9144 m (30,000 ft). Maximum allowable altitude change rate is 457 m/min (1500 ft/min).
<b>Acoustic Noise</b>	<p>Listed are the declared A-Weighted sound power levels (LWAd) and declared average bystander position A-Weighted sound pressure levels (LpAm) when the product is operating in a 24°C ambient environment. Noise emissions were measured in accordance with ISO 7779 (ECMA 74) and declared in accordance with ISO 9296 (ECMA 109). The listed sound levels apply to standard shipping configurations. Additional options may result in increased sound levels.</p>	
	<p>Typical configuration (Two Intel® Xeon® E7-4890 v2 processors, 8x16 GB DIMMs, five HDDs, Eight fans, Four power supplies)</p>

### Environment-friendly End-of-life Management Products and Approach and Recycling

Hewlett-Packard offers end-of-life HP product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to: <http://www.hp.com/go/green>. To recycle your product, please go to: <http://www.hp.com/go/green> or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: <http://www.hp.com/go/green>. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.

### Summary of Changes

Date	Version History	Action	Description of Change:
19-Dec-2014	From Version 12 to 13	Changed	Changes made to NA version only. Matching version numbers
01-Dec-2014	From Version 11 to 12	Changed	Core Options and Memory sections were updated
		Added	Sku Added on Hard Drives: 757339-B21
01-Nov-2014	From Version 10 to 11	Changed	Service and Support section was updated
29-Sep-2014	From Version 9 to 10	Added	Skus added on HP Hard Drives: <ul style="list-style-type: none"> <li>• 764923-B21</li> <li>• 764925-B21</li> <li>• 764927-B21</li> <li>• 764929-B21</li> <li>• 756657-B21</li> <li>• 756636-B21</li> <li>• 756621-B21</li> <li>• 756601-B21</li> </ul>
09-Sep-2014	From Version 8 to 9	Changed	Overview and Additional Options sections were updated
		Removed	Obsolete sku was removed: <ul style="list-style-type: none"> <li>• AF902A</li> </ul>
		Added	Skus added: <ul style="list-style-type: none"> <li>• 732456-B21</li> <li>• 655710-B21</li> <li>• 655708-B21</li> <li>• E7Y06A</li> </ul>
18-Aug-2014	From Version 7 to 8	Changed	What's New, Configuration Information (Memory, FlexibleLOM), Core Options (Memory, Hard Drives, Networking, HP Graphics Options, HP I/O Accelerators Options), Additional Options (HP Power Cords, HP Converged Network Adapters, HP Infiniband Options, HP Storage Options, HP USB and SD Options) and Memory sections were revised.
14-Jul-2014	From Version 6 to 7	Changed	Correction made to the Technical Specifications section.
27-Jun-2014	From Version 5 to 6	Added	What's new section was added Acoustic noise in Technical Specifications section was added
		Changed	FlexibleLOM in standard features section was updated FlexibleLOM in Configuration Information-Factory Integrated Models was updated HP Networking in Core Options was updated HP Storage Options in additional options was updated
10-Jun-2014	From Version 4 to 5	Changed	Memory, Networking, Hard Drives, Storage Controllers, HP Basic and Remote Monitoring Power Distribution Units were revised.
